

## DevOps Manager (f/m/d)

AssetMetrix is Europe's leading tech-enabled asset servicer. We offer modular outsourcing solutions for private capital investors. Our services enable private capital investors to free up their own resources for making investment decisions, benefit from our state-of-the-art IT landscape and analytics, and increase in-house transparency for optimal decision-making.

The AssetMetrix team has more than 23 years of experience in servicing institutional capital investments and operates without conflicts of interest. AssetMetrix is not an investor, an investment consultant, or a placement agent, but currently administers portfolios with a total volume of over €12 billion and more than 1500 funds. We currently employ 55 people at our Munich location.

Building software to support the AssetMetrix business model is a challenging but rewarding endeavor. Our solution digitizes the world of private capital and empowers our clients to make the most out of their portfolios. We achieve this with a collection of innovative digital services that are either already available on our platform or defined in our roadmap – waiting to be implemented. We are looking for DevOps managers like you to assist us with enhancing and maintaining a secure, scalable server-side architecture to meet increasing automation and business continuity requirements that come with the client growth of AssetMetrix.

### YOUR TASKS

- Fully containerize our server-side architecture
- Support our development teams in creating and maintaining an increasingly automated environment
- Manage and enhance the existing CI/CD setup
- Participate in the conception, implementation and operation multiple-data-center deployment capabilities
- Collaborate with the development teams to ensure the scalability of our platform
- Collaborate with the development teams to ensure the security of our platform – also at the operational level
- Collaborate in the development of our future architectural concepts

## **YOUR PROFILE**

- Bachelor's degree or higher in computer science, engineering or natural sciences
- Knowledge with containerized environments
- Knowledge with CI/CD toolkits
- Experience with deployment pipelines

## **OUR OFFER**

- Exciting challenge in a rapidly developing, dynamic industry
- Good development opportunities in a constantly growing and international team
- Active contribution to the success of our company
- Short communication channels
- Performance-related remuneration
- Attractive workplace in the heart of Munich
