

## UI Developer (m/f)

AssetMetrix is Europe's leading next generation asset servicer. We offer modular outsourcing solutions for private capital investors. Our services enable private capital investors to free up their own resources for making investment decisions, benefit from our secure IT system and state-of-the-art analytics, and increase in-house transparency for optimal decision-making.

AssetMetrix has more than 20 years of experience as a service provider in institutional capital investment and operates without conflicts of interest. AssetMetrix is not an investor, an investment consultant, or a placement agent, but currently administers portfolios with a total volume of over €10 billion and more than 900 funds.

We are currently looking for a **UI Developer (m/f)** to support our Munich team.

Are you a creative mind motivated to make a decisive impact on how the future digital services for our customers are to be designed and implemented? Do you want to join a dynamic team, and, within a flat hierarchy, contribute to the growth of a company that is aiming to become the pioneer for the next natural stage of development of internal structures of fund managers, institutional investors, family offices and financial service providers?

### YOUR RESPONSIBILITIES

- In a small but strongly innovation-oriented IT team you will be the leading expert for defining, designing and implementing the AssetMetrix digital face to the customer in form of portal and mobile applications.
- You will be responsible for recommending the appropriate technological frameworks to be employed, you will strongly influence the architecture and IT design of the AssetMetrix digital services and at the same time you will, in the role of a key UI Developer, be expected to implement concepts and technology into realized user experience.
- You will predominantly work with single-page architectures and JavaScript as the core technology – combined with cutting-edge frameworks and innovations in web and mobile programming.
- You will collaborate with data visualization experts, backend developers and system integrators to provide a unique, high quality, high value added user experience to our customers.
- You will furthermore be involved in the on-boarding of new customers onto our portal and mobile services, in the development of prototypes and in the experimentation, from a technological point of view, with innovative data processing and visualization concepts.

### YOUR SKILLS AND REQUIREMENTS

- You hold a bachelor's or master's degree in (applied) computer science, in a combined business administration and computer science program or in any other field with a strong focus on software development.

- You have a strong track record in UI development with JavaScript and JavaScript-related technologies and frameworks (e.g. Angular, Ember, React or similar).
- You have optionally experience in Clojure and ClojureScript.
- You have a strong track record in HTML, CSS and related technologies.
- You have experience in mobile app development.
- You are an expert in UI development environments.
- You have experience in cross-browser and cross-mobile-platform development.
- You are optionally skilled in data-retrieval and data-manipulation techniques, in data visualization with d3 and in web-service technologies.
- You have a strong focus on quality in all aspects of software development and you have an eye for details and the overall ergonomics and aesthetics of user interfaces.
- You perceive software development as a team effort but can nevertheless pursue your objectives pro-actively and independently, if required.
- You have experience in agile development practices.
- You are fluent in German or English.

#### **OUR OFFERING**

- We offer competitive remuneration.
- We offer the opportunity to influence all technological aspects of a rapidly evolving IT environment and grow with your responsibility.
- We offer the opportunity to be part of a culturally diverse, motivated and highly skilled team at an early stage of business development.
- We offer a working place in the center of Munich.

#### **ARE YOU INTERESTED?**

We look forward to receiving your application! Please send it electronically to our HR department:
